Subject: Final Notices of Environmental Conditions for VB/I-70

Richard – I'm getting antsy about getting these letters and notices ready for mailing the 1st of June. Right now neither Councilwoman Montero nor Councilman Brooks have provided any comments on the draft letters or the notices. I figure that we can go ahead and finalize the notices since I really don't think there is much that could be changed – it's a legal document.

The State sent comments from both Jennifer Robbins and from a Kate ?? (a tech editor??) and the City had no comments on either the letters or the notices. have made revisions to both notices based the State comments. I did not agree with a couple of them from the tech editor but otherwise, they were fairly minor and added clarification – I think.

Attached are both notices REDLINED for your review. There are a couple of formatting issues that I will have Louise (our admin) fix for us so don't worry about those. I've also attached the April 10 draft for your convenience. Please review and if you concur, then I'd like to send these to Jennifer early next week to have their contractor translate them into Spanish.

I wasn't planning on circulating the notices to my managers for their concurrence but you may need to??? Please let me know if you will not be able to review and concur on the final notices by Monday, May 13th.
Thanks

Paula Schmittziel
